## EXPERIENCE

**Playbook Sports** — **Hoboken, NJ**

*Customer Success and Product Manager* — December 2025 – May 2026

- Led system integration and data migration from legacy platforms for 15 clients projected to process $4M annually
- Authored technical documentation for 40+ feature and data model specs, turning business requirements into agile sprints
- Synthesized requirements from customer success, sales, and engineering stakeholders into a prioritized product roadmap
- Architected the company's first LLM-powered AI agents to generate feature docs from Jira tickets, cutting that work by 80%
- Managed a client portfolio across the full lifecycle, from data and system integration through platform support and renewal
- Served as primary client point of contact, surfacing needs and ensuring each account got full value from the platform

*Strategic Partnerships and Marketing Associate* — August 2025 – December 2025

- Directed engineers building web scraping pipelines and CRM development projects for lead generation
- Engineered data-driven outbound workflows that drove a sustained 60% increase in active pipeline generation
- Enriched scraped lead data and loaded it into HubSpot via its API, building custom properties and automated workflows

**Revolution Learning** — **Brooklyn, NY**

*Educational Data and Programs Consultant* — December 2023 – August 2025

- Served as lead data engineer for 3 client schools, owning admin tech systems for instruction, admissions, and state testing
- Engineered Python ETL pipelines automating student-progress reporting from 9+ student progress tracking sources
- Designed analytics dashboard systems in Looker Studio, Tableau, and Google Workspace with automated weekly refreshes
- Wrote SQL against Google Workspace data to resolve urgent ad hoc requests from key school system stakeholders
- Standardized system configurations across client schools and trained end users on blended-learning technology

**Interscope Geffen A&M Records** — **Los Angeles, CA**

*Business Intelligence Analyst* — June 2022 – June 2023

- Built automated reporting dashboards in Tableau and Alteryx, owning end-to-end data cleansing, ETL, and visualization
- Delivered daily ad hoc analyses to C-suite executives and artist managers on time-sensitive title performance
- Pulled streaming data via APIs from all major DSPs (Spotify, Apple Music, Deezer, etc.) into real-time consumption reporting
- Conducted proprietary research across all music verticals and consumption methods using industry data sources

**Neuberger Berman** — **New York, NY**

*Senior Automation and Digitization Intern* — March 2021 – August 2021

- Contributed across the full build lifecycle of a data warehouse for the firm's alternative investment business lines
- Wrote SQL queries to analyze database prototypes and prepare them for ETL into the new data warehouse
- Served as business analyst on a major consulting engagement moving spreadsheet record-keeping to a governed data platform

## TECHNICAL PROJECTS

**Association GM –** *NBA Salary Cap & Trade Modeling Platform · github.com/calebcpratt-git/nba-roster-builder* — June 2026 – Present

- Built a full-stack Next.js/TypeScript app on Supabase and Vercel modeling cap math, trade legality, and CBA contract rules
- Engineered a Python scraping pipeline across 5 data sources, run by scheduled GitHub Actions with schema-drift detection
- Integrated a Claude API tool-use agent that queries player, contract, and cap data to answer roster-strategy questions

**Parking Mandate Atlas –** *Municipal Parking Code Comparison Platform · (private GitHub repo)* — September 2026 – Present

- Architecting a platform to ingest every U.S. municipal parking code, region by region, stored on a custom nested JSON schema
- Built agents that locate cities' codified parking ordinances and translate code text into database schema

## EDUCATION

**The University of Texas at Austin** — May 2022

Bachelor of Business Administration, Management Information Systems
Minor: Accounting · Overall GPA: 3.80 (University Honors – 6 Semesters)
Coursework: Advanced Analytics Programming (ML), Enterprise Computing, Data Management (SQL), Algorithms and Data Structures

## UNDERGRADUATE LEADERSHIP EXPERIENCE AND ACTIVITIES

**Kappa Alpha Order – Member** — Fall 2018 – Spring 2022

*Treasurer (Fall 2020 – Fall 2021)*

- Managed all financial planning, dues collection, budgeting, and related communications for a $1.5 million annual chapter budget

## ADDITIONAL INFORMATION

**Languages & Data:** Python (pandas), SQL (BigQuery), TypeScript, PostgreSQL, REST APIs, Google Apps Script, Excel/VBA
**Frameworks & Infra:** Next.js, React, Vercel, GitHub Actions, Git/GitHub
**AI & Analytics:** Claude API (tool use, structured outputs), Claude Code, Tableau, Alteryx, Looker Studio, Jira, HubSpot
